Aaron Fisher, Extension Specialist, Department of Animal Science

Maria Prado, Professor, Department of Animal Science

Jennifer Richards, Curriculum Specialist, University of Tennessee Extension

Animal Husbandry

- Identify basic needs for adequate care of animals such as housing, feed and water.
- Choose one type of animal and create a basic care plan to meet its needs.
- Explain uses and roles of various types of animals in society.

Animal Health and Disease

- Identify the signs various types of animals display during times of health and disease.
- List the five most common diseases in each of the following: cattle, horses, swine and small ruminant animals.
- Identify common animal diseases that can affect humans.
- Describe general information about an animal disease of interest.

Veterinary Roles

- List the common day to day activities performed by veterinarians.
- Interview a veterinarian about the diverse roles veterinarians have in your community.
- Explain the education needed to become a veterinarian.
